CAREER OBJECTIVE

A motivated Backend Engineer and Flutter Developer with a strong focus on building secure, scalable, and high-performance systems while delivering intuitive and engaging user experiences. Committed to writing clean, maintainable code and continuously improving product reliability and usability.

WORK EXPERIENCE

Freelancer

Jan 2026 - Present

Freelancer, Virtual

In freelancer.com I used to take projects from client . Mostly client asked for developing full stack application on business, grocery store application etc. I used to make scalable backend and clean ui based full stack apps for client along with a admin panel. I also work a wen developer.

Tech Stacks:

1. Java Spring Boot
2. AWS
3. Flutter
4. React JS
5. Mysql
6. MongoDB

EDUCATION

Bachelor of Engineering (B.E), Information Technology

2024 - 2028

JADAVPUR INIVERSITY

TRAININGS / CERTIFICATIONS

Learn Ethical Hacking From Scratch

Jul 2024 - Aug 2025

udemy, Virtual

Completed a ethical hacking course from udemy. Through out the course I learnt so much about linux os and networking. I also learnt how to make our system secure.

PORTFOLIO

[GitHub link ↗](#)

PROJECTS

[Personal Portfolio ↗](#)

Dec 2025 - Jan 2026

I build a modern 3d personal portfolio for myself using flutter web. The website is clean and futuristic . I am currently working on it to build it more better and attractive.

[Banking Backend System | Spring Boot ↗](#)

Nov 2025 - Jan 2026

Designed and developed a highly secure, ACID-compliant banking backend system using Spring Boot, focused on reliability, scalability, and regulatory-grade security. The system supports core banking operations such as account management, transaction processing, and authentication while ensuring data integrity and consistency under high concurrency.

[Real-Time Chat Application using Spring Boot, WebSocket, STOMP & SockJS ↗](#)

Nov 2025 - Jan 2026

Designed and developed a real-time chat application using Spring Boot and Java, enabling low-latency, bi-directional communication through WebSocket technology. Implemented the STOMP messaging protocol to support a scalable publish/subscribe architecture and integrated SockJS to provide reliable fallback transport for browsers without native WebSocket support.

The application supports topic-based message broadcasting, clean separation of concerns, and extensible backend design. Emphasis was placed on performance, reliability, and modern event-driven communication patterns commonly used in enterprise-grade systems.

[Ferm App \(Dart + Node js\) ↗](#)

Aug 2025 - Dec 2025

Built a user friendly, easy to use app for farmer with realtime AI chat bot, crop image recognition tool that can give instant answer from backend(Node js).

[Coding App \(Flutter\) ↗](#)

Apr 2025 - Aug 2025

Built an app for coders to code in mobile/smartphones. I integrated an online api for getting output and also implemented an option to put code from a picture/screenshot to the realtime text editor.

SKILLS

- Flutter
- Spring Boot
- UI & UX Design
- Next.js
- Java
- React Native

EXTRA CURRICULAR ACTIVITIES

- Love to solve data structure and algorithm question on Leetcode.com.

[Social Media Flutter App ↗](#)

Oct 2025 - Jan 2026

Implemented user authentication, profile management, and real-time chat using Firebase. Integrated image upload and storage with Firebase Storage.

[Smart Farming Application for Indian Farmers | AgriTech Platform ↗](#)

Aug 2025 - Nov 2025

Designed and developed a comprehensive smart farming mobile application aimed at empowering Indian farmers with modern agricultural technology, data-driven insights, and real-time monitoring to improve crop yield, resource efficiency, and decision-making.
